PROFESSIONAL PROFILE

Technical Solution Consultant and Operations Engineer with 10+ years of experience supporting IT infrastructure, SaaS platforms, systems integration, and highly technical production environments. Expertise in Tier-3 troubleshooting, incident management, root cause triage, API integrations, database analysis and quality assurance operations management.

Led complex KYC, technical discovery, PoC, training, integrations, for SME and enterprise level B2B clients across North America, APAC, and DACH regions. Fluent in resolving high-impact technical issues as well as presenting high-stakes product demonstrations, improving performance, and driving operational excellence at scale.

My work revolves around breaking down technical processes and outcomes and presenting the ROI to investors and stakeholders. Bridging the gap between customer support and software development and taking full responsibility of optimizing operational processes, and delivering scalable technical solutions.

PROFESSIONAL EXPERIENCE

tripunkt GmbH — QA and Release Validation (2024 – 2026)

- Led a team of 4 through the complete pre-release manual QA lifecycle across 3 annual releases per year.

- Managed a suite of ~100 test cases covering frontend behaviour, database schema integrity, REST API validation, and third-party connector integrations within Docker testing environments.

- Owned defect management end-to-end in JIRA, writing structured reproduction steps, coordinating hotfix verification with engineering, and retesting until closure.

- Authored and maintained release notes, test documentation, and QA specifications in Confluence with full release sign-off accountability.

tripunkt GmbH — Software Solution Consultant (2020–2024)

- Resolved approximately 40 Tier-3 incidents weekly across global enterprise customers support, SaaS deployments, troubleshooting API integrations, application services, and database layers.

- Led the GTM strategies and SDR with a cross-functional team of 5, for the international market, leading the full international customer lifecycle.

- Implemented frameworks for global sales, support and troubleshooting to support enterprise onboarding across NAM, APAC, and DACH regions.

Larsen and Toubro — Technical Training Coordinator (2015–2016)

Led the technical enablement, onboarding infrastructure design, curriculum engineering, and mentorship of over 60 incoming engineers across parallel engineering tracks per quarter.

Project liaison between the Indian, Bangladeshi and Japanese C-level stakeholders, defining requirements and priorities to streamline training initiatives.

Earth Telecommunication Pvt. Ltd. — Network Operations Engineer (2013–2015)

Managed network architecture and incident resolution for over 500 SME and enterprise accounts, coordinated field services, installation scheduling, maintaining strict high-uptime and SLA compliance.

Standardized structural troubleshooting frameworks across localized hardware, multi-layered routing protocols, and configuration layers, decreasing Mean Time to Resolution (MTTR).

Developed a Python tool to scan live hosts and aggregate device relationship data, then rendered the output as an interactive JS/HTML topology graph for real-time component isolation and data-path tracing.
